SWOT Analysis

Swot analysis :- It is a measuring tool to gauge individual or company's strengths, weakness, opportunities and threats. To calculate growth patterns or sustainability, and also to measure market entry decision.

| | | |
|--|--|---|
| Controlled internally Internal factor | <u>Strengths</u> what does your organization do better than your competition. | <u>Weakness</u> what does your organization need to improve upon. |
| External factor | <u>Opportunities</u> what market trends could lead to increased sales. | <u>Threats</u> what are the advantages your competitors have over your organization. |

1) Strengths :-

- characteristics of the business or a team that give it an advantage over others in industry.
- positive tangible and intangible attributes, internal to an organization.
- beneficial aspects of an organization like brand loyalty, customer goodwill, human competencies etc.
- eg- well known brand name, low cost, better marketing skills.
- strong R & D team
- market size & market penetration
- customer loyalty
- global relations
- advance technologies.

- Strong distribution channel
- low investment & less wastage
- product features.
- HR talent & skills.
- product size & product volume.

2) Weaknesses :-

- characteristics that place the firm at a disadvantage relative to others
- financial losses & financial burden
- which do not meet the standards which we feel they should meet.
- Sometimes weakness are controllable.
- They must be minimized & eliminated
- eg - % of corruption
 - absence of HR skills & talent
 - weak industrial relations
 - poor quality of product (features, specifications, price.
 - low govt. funding
 - low profit
 - high cost, high wastages.
 - industrial unrest.

3) Opportunities :-

- chances to make greater profits in environment
- external attractive factor that represent the reason for an organization to exist & develop
- Technological advancement (new technologies for innovation)
- changing consumer preferences
- explore international market
- expanding product/services (diversification)
- identify market trends
- capitalizing in favorable govt. policies.
- collaborate with key industrial players.

Threats :-

- external elements in the environment that could cause trouble for business
- which could place organization's mission at risk.
eg -
 - entry of foreign competitors.
 - changing customer needs
 - economic downturn.
 - increased govt. regulation
 - supply chain disruption
 - reputation damage
 - cybersecurity risks
 - resource scarcity.
 - technical disruptions.
 - natural disasters.
 - intense competitive rivalry.

Aims to Swot analysis

- 1) To help decision makers to share & compare ideas
- 2) To bring clear purpose & understanding of factors for success
- 3) To organize important factors linked to success & failure.
- 4) allow complex idea to be presented systematically.

When to use Swot analysis

- 1) Strategic planning
- 2) Business assessment
- 3) Product or service launch
- 4) Market research
- 5) Competitive analysis
- 6) Project evaluation.
- (7) Risk assessment
- (8) Team building
- (9) Personal development
- (10) Decision making
- (11) Problem solving
- (12) Non-profit organisations.

How to conduct SWOT analysis

1) Analyzing internal & external environment

- develop clear understanding of factors which could influence success and failure
- these factors identified as SWOT.

- establish the objectives for which SWOT is carried out
- listing S, W, O, T.
- creating more open workshop environment
- select contributors
- gather information
- develop strategies
- continuous improvement
- monitor progress

3) Prepare action plans

- things that ~~be~~ can be handled now
- things that should be researched further
- " " " planned for future
- " " " addressed immediately.

Disadvantages of SWOT / Pitfalls :-

- 1) It lacks detailed structure so key elements may get missed.
- 2) needs to be conducted regularly for effectiveness
- 3) very subjective → can be use as a guide but not as prescription. as two people rarely come up with same version.
- 4) limited scope as not consider as broader societal or environmental impact
- 5) simplistic → due to which certain key strategic points overlooked
- 6) false sense of security. (7) difficult in predicting future trends (8) overemphasis on negative aspects

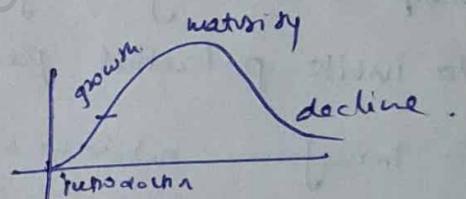

Government Policies & Programmes for Entrepreneurship

Objectives-

- 1) employment generation
- 2) enlarging market size
- 3) advance technology
- 4) better utilization of resources & land
- 5) multipolar market
- 6) Talent management
- 7) restricting brain drain
- 8) retaining talent firms outside india.
- (9) increase national gdp and per capita income
- (10) promoting innovations
- (11) multi diversity in products / services
- (12) promoting IPR.

(1) Start-up India scheme & -

- 1) To promote young talent
- 2) providing seed capital to start ups
- 3) providing tax benefits & funding.
